PROJECTS

Web-Based Donation Platform

Built a donation platform for charitable organisations using PHP/Laravel. Deployed in a real professional setting.

MikroTik Network Infrastructure – School Lab

Implemented network infrastructure with MikroTik firewall rules and a Telegram chatbot for real-time monitoring alerts.

Multi-Tank Level Monitoring System

Contributed to a real-time monitoring system for 6 tanks using Arduino Nano, RS-485, and waterproof ultrasonic sensors. Handled documentation, testing, and firmware modification.
